Jute®

Elegant and sophisticated, Jute vanities are a contemporary play on midcentury modern design. They make a stunning design statement as a wall-hung piece or with metal legs.

Wood is a living component

Wood's inherent beauty is enhanced by natural variations in grain, color and pattern. No two pieces of wood are exactly the same, and the color will change with age and exposure to light. We have embraced these natural variations within our choices of natural wood as living designs as opposed to throwing pieces away that may be perceived as imperfect.

The nature of woodgrain can cause variations in stain depth. Our expert craftspeople hand-apply the stain to blend these variations as evenly as possible.

Mineral Streaks and Pits
Cherry wood has naturally occurring mineral streaks and pits (shown above). These are natural characteristics of cherry woodgrains.

Color Variations
Our products are hand-stained and great care is taken to stain everything as evenly as possible. Variations in the grain of the wood will cause the products to take stain differently. Natural finishes, such as Khaki White Oak and Terry Walnut (shown above), are most likely to have variations because they do not have a stain to even out the finishes.

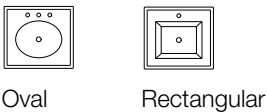

2 Choose your top

The tops of the KOHLER® Tailored vanity collection come in a range of colors, shapes and materials to personalize your space. These tops are available in up to six industry-standard sizes to complement KOHLER Tailored® vanities or to give your existing vanity an updated look.
